RP-15MC

Following the success of the RP-10, 21 and 22X Headphones in the marketplace, many of our dealers began telling us there were many customers who required a cost effective headphone, that would be compact and foldable, and yet offer a professional level of performance. Delivering on most of the more significant features and benefits requested by the market at a competitive price proved difficult, but obviously not too much of a challenge for Equation Audio.

Thus the introduction of the RP-15MC, Mid-size cup, full circum-aural, foldable stereo headphones, that not only perform at a professional level, like their siblings they also have the 'removable cable' feature found on the RP-21 and 22X.

RP-15MC's . . . a unique alternative professional headphone:
